General Report Comments:

Document No: 1143495      Validation Date: 30 October 2024

Identification

Identification  
 Mineral Type: Natural Corundum      Transparency: Transparent  
 Variety: Sapphire      Color Description: Blue

Carat Weight: 5.13 cts      Shape: Oval  
 Measurements: 10.07 x 8.47 x 7.16 mm      Cutting Style: Mixed Cut

Comments: This stone exhibits a slight color-shift when viewed under incandescent and fluorescent lighting conditions.

Origin  
 Provenance: Ceylon (Sri Lanka)

Origin

Comments: It is the opinion of the Laboratory, based on the weight of evidence that the origin of this material would be classified as Ceylon (Sri Lanka).

Enhancement  
 Standard: No gemological evidence of heat      Additional: Clarity enhancement: None

Enhancement

Comments: Non-heated sapphires are scarce. Sapphires are commonly heated to modify their color and appearance.

American Gemological Laboratories™  
 America's first and most highly respected origin lab.

Founded in 1977,  
 AGL is an internationally recognized gemstone testing facility, specializing in comprehensive colored stone analyses.

AGL has the distinction of being the first laboratory in the United States to issue Country-of-Origin reports. Our company and its principals have a long tradition of research into the detection of and reporting on gem identification-and-classification, gemstone treatments and provenance determinations.

Our staff is composed of experts in the field of gemstone testing and reporting. Our findings reflect the latest knowledge and analytical techniques to ensure the highest standards are applied on every stone we test.

AGL's testing and reporting methodology provide you with unsurpassed quality and reliability. We are committed to providing the highest level of service and reporting that our clients and the industry have come to expect from the AGL.
